INDEX

ABSORPTION and elimination of water, relation between, in Termopsis angusticollis, 505.

ADDISON, WILLIAM H. F., and MAURICE N. RICHTER. A note on the thyroid gland of the swordfish (Xiphias gladius, L.), 472.

Adrenaline, branchial responses to, in the eel, 327.

Aggregating behavior of Ameiurus melas, 258.

ANDERSON, BERTIL GOTTFRID. The number of pre-adult instars, growth, relative growth, and variation in Daphnia magna, 81.

Annual report of Marine Biological Laboratory, 1.

Anuran larvæ, hydrogen-ion concentration of blood of, during involution, 405.

Ascidian egg, mosaic development of, 381.

BARNES, T. CUNLIFFE. Salt requirements and space orientation of the littoral isopod Ligia in Bermuda, 496.

BATEMAN, J. B. *See* Keys and Bateman, 327.

BERRILL, N. J. The mosaic development of the ascidian egg, 381.

BODINE, JOSEPH HALL, and TITUS C. EVANS. Hibernation and diapause. Physiological changes during hibernation and diapause in the mud-dauber wasp, Sceliphron cæmentarium (Hymenoptera), 235.

BOWEN, EDITH S. Further studies of the aggregating behavior of Ameiurus melas, 258.

CENTRAL body structure in Chætopterus at metaphase, first cleavage, after picro-acetic fixation, 149.

Chiasmata, origin and behavior, in Chorthippus elegans and Hyacinthus amethystinus, 357, 368.

Chromosomes of artificially activated eggs of Urechis, 212.

CLAUSEN, H. J. Rate of regeneration of partly histolyzed anuran tail skin, 129.

Cleavage, production of, by suppression of polar bodies in artificially activated eggs of Urechis, 218.

COE, W. R. Sexual phases in the American oyster (Ostrea virginica), 419.

Colpidium campylum, experimental production of chains in, 187.

COOK, S. F. The respiratory gas exchange in Termopsis nevadensis, 246.

COOK, S. F., and K. G. SCOTT. The relation between absorption and elimination of water by Termopsis angusticollis, 505.

Crustacean eye hormone as vertebrate melanophore activator, 108.

Crystallization, intracellular, of hemoglobin, in erythrocytes of northern pipefish, 492.

Cyclotrichium meunieri, sp. nov., 74.

DAPHNIA magna, number of pre-adult instars, growth, relative growth, and variation, 81.

DARLINGTON, C. D. The origin and behavior of chiasmata. V. Chorthippus elegans, 357.

DARLINGTON, C. D. The origin and behavior of chiasmata. VI. Hyacinthus amethystinus, 368.

DAWSON, ALDEN B. Intracellular crystallization of hemoglobin in the erythrocytes of the northern pipefish, Syngnathus fuscus, 492.

DAWSON, ALDEN B. The reaction of the erythrocytes of vertebrates, especially fishes, to vital dyes, 48.

Diabetes, pancreatic, influence of hypophysectomy on, in dogfish, 477.

Diapause in the mud-dauber wasp, 235.

Diapause, physiological changes during, in Sceliphron cæmentarium, 235.

Dogfish, influence of hypophysectomy on pancreatic diabetes, 477.
Dominance of two kidney allelomorphs in Habrobracon juglandis (Ash.), 372.
Double monsters in pond snail, 400.
DRAPER, JOHN W., and DAYTON J. EDWARDS. Some effects of high pressure on developing marine forms, 99.
Drosophila, rate of oviposition in, 456.
Dyes, vital, reactions of erythrocytes of fishes to, 48.

EDWARDS, DAYTON J. *See* Draper and Edwards, 99.
Eel, branchial responses to pitressin and adrenaline in, 327.
Elimination and absorption of water by Termopsis angusticollis, 505.
Embryology of Urechis, 387.
Erythrocytes, of fishes, reactions to vital dyes, 48.
EVANS, TITUS C. *See* Bodine and Evans, 235.
Eye hormone, crustacean, as vertebrate melanophore activator, 108.

FERRIS, J. C. A comparison of the life histories of mictic and amictic females in the rotifer, Hydatina senta, 442.
FRY, HENRY J. Studies of the mitotic figure. I. Chætopterus: central body structure at metaphase, first cleavage, after picro-acetic fixation, 149.
Fundulus eggs, effects of high pressure on, 99.

GENETIC consequences of experimental production of chains in Colpidium campylum, 187.
Genetics and development, 337.
GOLDSCHMIDT, RICHARD. The Fourth Reynold A. Spaeth Memorial Lecture. Genetics and development, 337.
Growth and variation in Daphnia magna, 81.

HABROBRACON juglandis (Ash.), dominance of two kidney allelomorphs, 372.
Habrobracon, modification of traits in mosaics from binucleate eggs, 296.
HELFF, O. M. Studies on amphibian metamorphosis. X. Hydrogen-ion concentration of the blood of anuran larvæ during involution, 405.
Hemoglobin, intracellular crystallization of, in erythrocytes of northern pipefish, 492.
Hemolysis, rate of, of erythrocytes in hypotonic solutions of electrolytes, 224.
HERRICK, EARL H. Mechanism of movement of epidermis, especially its melanophores, in wound healing, and behavior of skin grafts in frog tadpoles, 271.
Hibernation and diapause in the mud-dauber wasp, 235.
Hyacinthus amethystinus, origin and behavior of chiasmata in, 368.
Hydatina senta, comparison of life histories of mictic and amictic females, 442.
Hydrogen-ion concentration of blood of anuran larvæ during involution, 405.
Hypophysectomy, influence on pancreatic diabetes of dogfish, 477.

INSTARS, pre-adult, number of, in Daphnia magna, 81.
Involution, hydrogen-ion concentration of blood of anuran larvæ during, 405.

JACOBS, M. H., and ARTHUR K. PARPART. Osmotic properties of the erythrocyte. V. The rate of hemolysis in hypotonic solutions of electrolytes, 224.

KEYS, ANCEL B., and J. B. BATEMAN. Branchial responses to adrenaline and to pitressin in the eel, 327.
Kidney allelomorphs, dominance of, in Habrobracon juglandis (Ash.), 372.
KROPP, BENJAMIN. *See* Perkins and Kropp, 108.

LACKEY, JAMES P. Oxygen deficiency and sewage Protozoa: with descriptions of some new species, 287.
Light, effect on rate of swimming of larvæ of mussel crab, 310.
Ligia, salt requirements and space orientation in, 496.

Lymnæa columella Say, polyvitelline eggs and double monsters in, 400.

MARINE Biological Laboratory, thirty-fourth report, 1.
Melanophore activation in vertebrates by crustacean eye hormone, 108.
Melanophores, induced by X-ray, compared with those existing in patterns as seen in Carassius auratus, 484.
Melanophores, mechanism of movement, in wound healing, 271.
Mictic and amictic females, comparison of life histories in Hydatina senta, 442.
"Mitogenetic rays," critique of yeast-detector method, 113.
Mitosis, studies on, central body structure in Chætopterus, 149.
Monsters, double, in pond snail, 400.
Mosaic development of ascidian egg, 381.
Mosaics, modification of traits in, from binucleate eggs of Habrobracon, 296.
Mussel crab, temperature and light effects on rate of swimming, 310.

NEWBY, W. W. The early embryology of the echiuroid, Urechis, 387.

ORIAS, OSCAR. Influence of hypophysectomy on the pancreatic diabetes of dogfish, 477.
Orientation in Ligia in Bermuda, 496.
Osmotic properties of erythrocytes, 224.
Ostrea virginica, sexual phases in, 419.
Oviposition, rate of, in the fruit fly, Drosophila, 456.
Oxygen deficiency and sewage Protozoa, 287.

PARPART, ARTHUR K. *See* Jacobs and Parpart, 224.
PERKINS, EARLE B., and BENJAMIN KROPP. The crustacean eye hormone as a vertebrate melanophore activator, 108.
Pinnotheres maculatus Say, influence of temperature and light on rate of swimming, 310.
Pitressin, branchial responses to, in the eel, 327.
Polarity of egg of Urechis caupo, 145.
Polyvitelline eggs and double monsters in Lymnæa columella Say, 400.
POWERS, PHILIP B. A. Cyclotrichium meunieri sp. nov. (Protozoa, Ciliata); cause of red water in the Gulf of Maine, 74.
Pressure, effects on developing marine forms, 99.
Protozoa, sewage, new species, 287.

REGENERATION, rate of, in partly histolyzed anuran tail skin, 129.
Respiratory gas exchange in Termopsis nevadensis, 246.
RICHARDS, OSCAR W., and G. WELLFORD TAYLOR. "Mitogenetic rays"—a critique of the yeast-detector method, 113.
RICHTER, MAURICE N. *See* Addison and Richter, 472.

SALT requirements of Ligia, 496.
Sceliphron cæmentarium (Hymenoptera), physiological changes during hibernation and diapause, 235.
SCOTT, K. G. *See* Cook and Scott, 505.
Sewage Protozoa, new species, 287.
Sexual phases in American oyster, 419.
SHAPIRO, HERBERT. The rate of oviposition in the fruit fly, Drosophila, 456.
SMITH, GEORGE MILTON. Melanophores induced by X-ray compared with those existing in patterns as seen in Carassius auratus, 484.
SONNEBORN, T. M. Experimental production of chains and its genetic consequences in the ciliate protozoan, Colpidium campylum (Stokes), 187.
Space orientation of Ligia in Bermuda, 496.
Spaeth Memorial Lecture, genetics and development, 337.
SPEICHER, B. R. Dominance of two kidney allelomorphs in Habrobracon juglandis (Ash.), 372.
Swimming, rate of, in larvæ of mussel crab, as affected by light and temperature, 310.
Swordfish, thyroid gland of, 472.
Syngnathus fuscus, intracellular crystallization of hemoglobin in erythrocytes of, 492.

TAYLOR, G. WELLFORD. *See* Richards and Taylor, 113.
Temperature, effect of rate of swimming of larvæ of mussel crab, 310.
Termopsis angusticollis, relation between absorption and elimination of water by, 505.
Termopsis nevadensis, respiratory gas exchange in, 246.
Thyroid gland of the swordfish, 472.
Traits, modification of, in mosaics from binucleate eggs of Habrobracon, 296.
TYLER, ALBERT. Chromosomes of artificially activated eggs of Urechis, 212.
TYLER, ALBERT. Production of cleavage by suppression of the polar bodies in artificially activated eggs of Urechis, 218.
TYLER, ALBERT. The polarity of the egg of Urechis caupo, 145.

URECHIS caupo, polarity of egg, 145.
Urechis, chromosomes of artificially activated eggs of, 212.
Urechis, early embryology of, 387.
Urechis, production of cleavage by suppression of polar bodies in artificially activated eggs, 218.

WATER, relation between absorption and elimination of, by Termopsis angusticollis, 505.
WHITING, P. W. Modification of traits in mosaics from binucleate eggs of Habrobracon, 296.
WINSOR, CHARLES P., and AGNES A. WINSOR. Polyvitelline eggs and double monsters in the pond snail Lymnæa columella Say, 400.
Wound healing, mechanism of epidermal movement in frog tadpoles, 271.

X-RAY-INDUCED melanophores, compared with those existing in patterns as seen in Carassius auratus, 484.

YEAST-DETECTOR method in mitogenetic ray study, critique of, 113.
